### Description

Follow the route to the intermediate station until you reach the underpass. However, do not go through it and do not stay on the toboggan run but turn left next to piste no.9 instead – it's an ascent through woodland terrain. Once you have reached the logging road of the Sechzeiger slope no.7 – follow it for approx. 200 m and then continue across a slightly hilly terrain through a small valley until you arrive just below the mountain station of the Sechzeiger ski lift.
