## Description

No matter if families with children or top climbers, here at the numerous boulders which spaciouly lie within a beautiful forest, everyone finds his or her boulder. The level of difficulty of the boulders is mainly from 3a up to 7a. Some boulders even have lines in the range from 7a to 8a.

Furthermore, there are also a couple of projects. The terrain of the descent is mostly flat. On steep parts, wooden pedestals are provided. For children, a Tipi made of wood is located between the boulders. The individual boulders are connected with a trail. The large meadow in the middle of the boulder area is ideal for taking a rest.
